A.F & A.M OF CANADA IN THE PROVINCE OF ONTARIO

A Message from our District Deputy Grand Master

"BUILDING A BETTER SOCIETY WITH INTEGRITY"

March is here and Spring is just around the corner - maybe! And shortly it will be the Spring Break. In spite of the trepidation experienced at the beginning of the Masonic year as some of the fears of Covid-19 fade a little, intrepid brethren have braved winter snow storms, freezing weather to not only attend lodge meetings but have attended the many social and other events in our District. Lodges are regaining their former zest and it has been a delight to visit and experience the warmth of fellowship on those cold winter nights.

In the February Grand Lodge Communiqué from the Most Worshipful Bro. Thomas Hogeboom he wrote an interesting article about leadership. Maybe time to think of leadership as installations of new Lodge Masters and Officers takes place. And changes occur throughout Freemasonry and the World at large.

An excellent definition of leadership might be: Leadership is a process of social influence, which maximizes the efforts of others, towards the achievement of a goal.

Some of the attributes of a leader include the following:

- *Eager to learn & adapt*
- *Empathy*
- *Honesty & Integrity*
- *Dedication towards a cause*
- *Service*
- *Interpersonal Skills*
- *Forward thinking.*
- *Decisiveness*
- *Awareness*
- *Focus*
- *Accountability*
- *Confidence*
- *Optimism*
- *Inspiration*

A Message from our District Deputy Grand Master

My Choice - of Many.....Leaders. Not All Military or Even Famous:

Major General Lewis MacKenzie: of the The Queen's Own Rifles of Canada (Rtd.) who commanded soldiers in the Bosnian conflict. He wrote a book about his experiences "Soldiers Made me Look Good" showing his loyalty to the soldiers under his command who always gave full credit to for their professionalism and skill.....They came first.

Mark Cutifani, P. Eng: A Chief Operating Officer of INCO. Another team leader. And as such he even took the door off his office so that anyone at INCO could to stop by to talk to him....He famously started the INCO Shines For Cancer Research in 2005 - people were encouraged to shave their heads for the fund raiser - it was a chilly Spring for some....Mark was the first line followed by "his team" - of course he had a head start as he didn't have much hair to start with! But Mark made a point of interacting with "his" team of INCO workers where ever and whenever he could.

Peter Ennis: Team Leader - coach of the Canadian women's basketball team at the Atlanta Olympics team and long-time coach of the Laurentian University women's team. Born and raised in Sudbury, Peter coached the Lady Vees for 17 years. Every year, his team made it to the Canadian Interuniversity Athletic Union championship tournament and won titles in 1989-90 and 1990-91. He was honoured as CIAU coach of the year in 1987 and 1991. He was named head coach of the Canadian women's basketball team in 1995 and qualified the team for the Atlanta Olympics in 1996. Peter was an amazing motivator and the tireless coach of "his" team 24/7... He was an amazing colleague and was always supportive of the endeavours of others. His motto was "Pride and Tradition". And he would always go beyond that extra mile.

A.F & A.M OF CANADA IN THE PROVINCE OF ONTARIO

A Message from our District Deputy Grand Master

Elsie Gregory MacGill: was Canada's first practicing woman engineer and the first female aircraft designer in the world. She graduated with a BSC in electrical engineering at the University of Toronto (1927) completing her Master's degree in Aeronautical Engineering at the University of Michigan in 1929. Elsie MacGill opened many doors and opportunities for women in this area of aviation in the years to come. She never actually piloted a plane, but acquired hundreds of hours on all test flights and stress analysis on prototype aircraft in her work designing primary trainer aircraft and their subsequent production in WWII. While studying at the University of Michigan, she was stricken with acute infectious myelitis, a form of polio.

During WW II Dr. MacGill was put in charge of all engineering work in connection with the production by Canada Car and Foundry Co. Ltd. of the famous Hawker Hurricane fighter aircraft for the British Government. In March 1953, the American Society of Women Engineers made her an honorary member with a medal and named her "Woman Engineer of the Year," in recognition of her meritorious contribution to aeronautical engineering. She had a brilliant mind and was recognized as an outstanding Canadian woman. Neither gender or disability prevented her from using her talents to serve her community and country.

*A lot more could be written.

A.F & A.M OF CANADA IN THE PROVINCE OF ONTARIO

A Message from our District Deputy Grand Master

Volodymyr Zelenskyy: President of Ukraine. At his inauguration as President of Ukraine in 2019 he famously said “I do not want my picture in your offices: the President is not an icon, an idol or a portrait. Hang your kids' photos instead, and look at them each time you are making a decision.” He has bravely stood by his country and inspired his fellow Ukrainians in true Churchillian fashion when Britain also stood alone in 1942...and stood its ground. For many he is a hero and an inspiration.

So here is the challenge. Share your ideas of leadership in the next edition of the District Newsletter. Are leaders born or are they created? Who are those who make a positive difference....?? And seeing that the 8th March is “International Women’s Day” maybe you could include women leaders.....And bear in mind what you can learn from the chisel in the first degree.

R.W. Lionel Rudd.

Mentors Minute

Brethren,

The ultimate goal of every Freemason, when his work in the here and now is done is to be admitted to the Grand Lodge Above and then stand before the Great Architect Of The Universe and be able to say “I did my duty to my family, my community and to Freemasonry...and I did it out of love, for my family, my community and Freemasonry.”

Masonry...Freemasonry is a relationship building, team building organization where value of the end product “brotherly love, relief and truth” is much greater than the individual parts but those individuals are still essential.

I look forward to sitting and serving with you in Lodge.

W. Bro. Robert Tailleir

District Project

Sudbury - Manitoulin - North Bay District Alzheimer's Society

The District Project is progressing extremely well and donations keep coming in. In order to contribute to the Project however PLEASE make your cheque payable to the Masonic Foundation of Ontario as follows:

- The project number to be used on all correspondence and fund submissions is: 2430.
- Cheques should be made payable to The Masonic Foundation of Ontario and show the project number on the face of the cheque.
- Alternatively there is the ability to accept e-transfers at donations@tmfo.ca.

Please ensure that all information is completed and filled in; the Canada Revenue Agency has very strict guidelines that must be followed in the preparation of charitable tax receipts.

The intended "Information Session" that was scheduled for Monday 30th January was postponed due to insufficient time to properly plan the event coupled with the likelihood of inclement weather. In order to make sure that a well planned information session takes place it is advisable to hold the event in the Spring (May?) in collaboration with other supportive events and hopefully a cheque presentation - and of course nicer weather.

For any details and information please contact: Lionel Rudd - DDGM at 705-522-3886 or ddgm@smmasons.com

A.F & A.M OF CANADA IN THE PROVINCE OF ONTARIO

WHO'S IN CHARGE????

At the opening of every Lodge meeting it is observed that the Worshipful Master is to “Instruct and Employ” the Brethren. The word is “instruct”, that leads to guidance and encouragement of the Brethren. **On no account should anyone criticize another’s performance at any time by name or the part of the Ritual, publicly or privately EVER.**

Lodge practice time, is the time to question the correct ways to do things. And of course the Worshipful Master may take advantage of the “Masonic Education” part of a meeting to focus on a specific item that needs revision or explanation and interpretation. Lodge activities (including the “work”) is an opportunity to appreciate the fellowship and warmth of the Lodge and observe Brethren putting effort and commitment into the work of the evening. If you intend to find fault and criticize - maybe stay at home.

THE DDGM’S OFFICIAL VISIT - NO! This is NOT an inspection. It is simply a snapshot of observing how a Lodge is doing...within certain parameters. It is a tool for Grand Lodge in general to assess what is called “The Condition of Masonry”. Both the District Deputy Grand Master and the District Secretary have to submit a questionnaire via the “L” forms. Both these officers are trained and instructed as to how they make their observations NOT criticisms. An important factor is that most Lodges are doing their best in spite of any setbacks and challenges.

The cartoon above kind of says it all. Go to “Masonic Cartoons” and “Masonic Cartoons UK” on your search engine for some humorous Masonic Education. These cartoons, while humorous in nature, point out some of the items best left out of the Lodge activities but they do occur - sad to say.

District Maple Hill Farm Event

Besides the visit to see how Maple Syrup is made and the enjoyment of tasting “taffy”, I will be there to engage those interested - especially the youngsters in some of the nature observations. The location of Maple Hill Farm is a large property of mostly hardwood maple trees along with a mix of other interesting woodland that dates back over a 100 years when it was first farmed. It is located on a hill overlooking much of the Hanmer valley and is very peaceful. If you can, bring binoculars to spot some of the bird life that includes quite a variety from nuthatches to woodpeckers and hawks that use the wooded areas for shelter and hideouts. The farm is well away from any built up areas and consequently has become a refuge for wildlife.

The current owners are preserving the history and heritage of Maple Hill Farm for all to enjoy and appreciate in their modernized processing facilities that follows the tradition of maple syrup making. There will be simple refreshments for the children courtesy of the District - look out for me by a burgundy coloured KIA minivan with balloons attached, for those interested.... AND TAKE LOTS OF PICTURES.

DIY Maple Syrup and Taffy

DO-IT-YOURSELF MAPLE SYRUP AND TAFFY -
THE "NOT SO GREEN" WAY!

Written By: Lionel Rudd. 522 3886

Canada is famous for three major things, the Mounties, Hockey and Maple Syrup. Well, we can write off the first two, the Mountie image is owned by the Disney empire. Hockey, our national sport is all but owned, operated and controlled by the Americans. All that is left is "maple syrup". We are blessed with an abundance of this hardwood tree across much of Canada, especially around the Sudbury area. Many people are lucky enough to have mature maple trees in their yards or at least in their neighbourhood.

Now that Spring is arriving, **at least according to the calendar**, and the sunshine has destroyed your backyard ice rink it is maybe time and an opportunity to try another backyard activity. All that is required is one or two or more mature maple trees (over 30 years old or so). If you don't have your own maybe a neighbour might oblige. As mother nature destroys your ice rink she sets into motion another natural phenomena - the rising of the maple sap. At the same time, the receding snow reveals a treasure trove of broken tree branches and twigs, left over from winter storms. A potential fuel source.

With a few simple items and patience you could be well on your way to providing your own, home grown, maple syrup and taffy.

Starting with a maple tree (or trees). Select trees of mature size - about a 12 inch diameter trunk at least. You'll need a 5/16 inch diameter drill. You can visit the Home Hardware Store in Lively where they have the traditional spigots and gathering buckets that you can use to collect the sap. For these spigots you only require a 5/16 inch drill with which you drill a 3 inch hole approximately 3 feet from the ground.

The setup is easy. Drill a 5/16 inch hole about 3 inches deep into the trunk of the tree about 3 feet from the ground. After drilling the hole gently drive in the "spigot". The spigot has a hook to attach the collecting bucket so simply hang the bucket on this hook and you are basically in business. The sap usually needs warm spring daytime temperatures and cold nighttime temperatures to "run". On a good day you can expect the yield of around 2 litres of sap per tree tap.

It takes 40 gallons of sap to make one gallon of syrup. In metric that translates to a ratio of 4 litres of sap to yield 100 millilitres of syrup! Of note is the fact that the sap can be used to make tea or coffee, boil it for around one minute first. This sap contains many nutrients and can make your tea or coffee taste different but nice. That is part one of the math. Now we get to part two which involves a mix of math, physics and thermal dynamics. Part two involves the amount of energy required to render the sap to syrup.

When making ice for the backyard ice rink we dealt with a phenomena called "heat of fusion" - how much energy that must be removed from water before it becomes ice. Now we must convert the water in the sap to a gas (steam). This is called "heat of vaporization". This is the amount of energy required to turn the liquid to steam. To achieve this and in order to ultimately end up with maple syrup we must apply 540 kilocalories per kilogram (or 972 British Thermal Units - BTU's per pound) of sap. You do the math..... But it goes without saying that when your gathering container is full, an incredible amount of energy is required before you get the pancakes ready for your homemade syrup.

Using a large stainless steel or cast iron container you must boil the sap in order to render it down to syrup. If you have lots of dead fall wood use a cast iron pot over an open fire - the odd piece of wood ash is said to enhance the flavour. To obtain taffy you must boil the sap beyond the 40 to 1 ratio mentioned. As it thickens pour some into some CLEAN SNOW!. You know the rest.....

It goes without saying that after you have burned all that wood and made your maple syrup you can only imagine how much you have contributed to the volume of greenhouse gases in the atmosphere. In any event, it is a fun exercise, the kids will enjoy cleaning up the yard of the all the dead wood and the maple syrup and taffy will taste if nothing else "unique". For the adventurous I have been told that using raw sap to make a batch of tea or coffee adds a new delight to our 100% Canadian icon - the maple tree.

The maple syrup season is quite short - usually from the middle of March to the 2nd or 3rd weeks of April. When the season is over remove the spigots and cover the holes with pruning compound. Clean containers and you are all set for next year.

Maple Syrup Dressing

(Pure Dynamite and Life Altering!!!)

Courtesy of: Peggy South, Worth Matron of the Eastern Star Algoma Chapter 139

1/2 cup vegetable oil (original recipe calls for olive oil)

1/2/c cup cider vinegar

1/2 cup maple syrup

Candied Pecans (for the salad)

2 cups pecans, chopped

1 egg white

1/4 c white sugar (can use brown sugar)

1 T cinnamon

1 tsp water

Mix sugar, cinnamon and water together

Dip the pecans in egg white, then in sugar mixture.

Spread coated nuts on parchment paper lined cookie sheet.

Bake at 350 degrees for about 15minutes.

Let cool and harden before using.

Salad Ingredients

salad greens (I used Spring Mix)

sweet onions, preferably Vidalia, sliced thinly or diced

crisp bacon bits (I used purchased **real bacon** bits and refried them to make them crispy)

craisins

candied pecans (I also added sunflower seeds)
